

THE HBU ENGINE FOR COMMERCIAL LISTINGS

**KNOW WHAT THE BUILDING
SHOULD BE.
KNOW WHO TO CALL.**

Broker + Executive Briefing · [Presenter name]

tenantscout.ai

EVERY LISTING STARTS HERE

WHAT SHOULD THIS BUILDING BE, AND WHO WANTS IT?

Get that right and everything after it moves faster: the pitch to the owner, the first calls, the tenant who signs. TenantScout answers it on the day you sign.

UPLOAD THE OM. IT SCREENS EVERY USE.

1

Allowed here?

Zoning district checked against the jurisdiction's permitted-use code.

2

Physically possible?

Clear height, doors, power, yard, office ratio, parking, frontage.

3

What would it take?

Plug-and-play ranks ahead of a heavy build-out.

4

Who wants it?

Size fit and submarket demand.

OUT COME THE TOP THREE USES, EACH WITH A FIT SCORE, CONVICTION AND THE REASONING.

YOUR JUDGMENT DRIVES IT

THE ENGINE DOES THE SCREENING. YOU MAKE THE CALL.

- Read the reasoning behind every ranked use
- Disagree? Override it, and the list rebuilds around your call
- Investment listing? It branches to buyer matching instead
- A prohibited use never reaches the list, so it never reaches a phone call

FROM THE RANKED USE TO THE CALL SHEET

FOR EACH USE, THE BUSINESSES THAT FIT IT.

- Phone, address, website where the record has them
- Distance from the property
- Talking points written for that business
- Do-not-call scrub
- Excel export, or work it in the app
- Leads seed the CRM; follow-ups come from call outcomes

LIVE DEMO: A REAL OM, START TO FINISH.

WHO WINS

EVERYONE AT THE TABLE.

THE TENANT

A space that fits their business, legally and physically, and a call that's about them.

YOU

First conversations the day you sign, a stronger listing pitch, and a real shot at your own tenant on your own listing.

THE OWNER

A clear answer to "what should this be?" with names attached, before the sign goes up.

ILLUSTRATIVE EXAMPLE · NOT LIVE MARKET DATA

ONE LISTING, START TO FINISH.

Single-tenant industrial building, light-industrial parcel, secured paved yard, grade-level doors.

#	USE	WHY IT RANKS	CONVERSION
1	Contractor / equipment yard	Secured yard, industrial zoning	Plug-and-play
2	Auto / fleet repair & service	Grade doors; permitted in the district	Plug-and-play
3	Light manufacturing	Zoning and power support it	Value-add

WHAT YOU TAKE INTO THE OWNER MEETING

WALK IN WITH THE ANSWER.

- The ranked uses and the reasoning behind each
- The businesses you'll call first, by use
- A plan the owner can see you working, week by week
- Follow-ups that come from call outcomes, not memory

WHY IT MATTERS AT THE FIRM LEVEL

THE SAME HBU DISCIPLINE ON EVERY LISTING.

Consistent analysis

Every broker, every office, the same screening on day one.

Stronger pitches

Walk into the listing presentation with the answer.

Faster leasing

Conversations start the day the listing signs.

More double-ends

The firm's broker finds the tenant for the firm's listing.

A record you keep

Leads, outcomes and follow-ups in a shared CRM.

Renewal radar

The first call on a renewal is yours.

PROVE IT ON REAL LISTINGS.

The shape

- A focused group of leasing brokers
- Real listings, current and newly signed
- Onboarding and a direct line to the founder

What we review together

- Did the rankings hold up?
- Did it change the pitch?
- How fast did conversations start?

MORE THAN A VENDOR CONVERSATION

WHERE'S THE STRONGEST FIT?

- **Firm-wide adoption** across an agreed group or business line
- **Design partner:** your brokers help shape the engine
- **Market-intelligence collaboration**
- **Preferred platform relationship**
- **Strategic partnership or investment**, where it's aligned for both sides

BRING US YOUR NEXT LISTING

**PILOT IT ON REAL LISTINGS.
TALK PARTNERSHIP.**
